

# Call of Duty®: Mobile

## # Summary

Based off the actual Call of Duty game series, the game was released in October of 2019. Just like the PC or console version, the mobile version of the game has become extremely popular and has millions of players everyday. The great thing about this game is that it has a lot of the same features and options as the PC or console versions. In addition to 2 in-game currency types, Call of Duty Mobile also offers battle pass, which gives you extra rewards and options for customization. In November of 2019, the developers released a zombies mode, which is just as popular as the mode on console or PC. Unfortunately, the mode was removed in March of 2020.

Players can choose the game mode they want to play in and create their own weapon loadout, depending on their preferences. As you level up your character, you can unlock new weapons, camo skins, and special items. One of the features that many players love is called Scorestreaks, which gives players special weapons as they level up. The developers also offer several different tournament and event options, which gives players the chance to earn exclusive items that can't be obtained any other way. You can play alone, on a team, or in a match with up to 100 other players. Each game mode has different goals and you'll need to meet these to win. # Gameplay

After customizing your character and choosing your weapons loadout, you can choose the game mode you want to play. After the lobby fills with enough players, the loading screen will pop up and players will be put into the match. Once on the map, the countdown timer will start and the match will begin. You'll start in a random spot on the map and you'll need to run around and try to find players from the other team. Once you see someone, you'll want to use your weapons and try to kill them before they kill you.

If you get killed, you'll respawn in a different location and you'll lose any scorestreak you were on. Before the match, you'll setup your scorestreaks and if you get the required amount of kills before dying, you'll be able to deploy the weapons you chose. Those with higher scorestreaks will get more powerful weapons that can deal a lot of damage in a short amount of time. Some people will choose to set one of their scorestreaks as a care package, which is an ammo box that drops from a carrier plane. You can get a variety of different weapons and it'll take a few seconds to open the package. This means you have the chance of being killed and losing your care package. The person or team that gets the most kills at the end of the game wins.

## # Final Review

Not only does Call of Duty Mobile have fantastic graphics, but the gameplay is on par with the PC or console versions of the game. You also have countless options when it comes to the customization of your character and weapon loadouts. Since it has such great gameplay and so many options, most people can deal with the spotty connection and limited map choices. It's

definitely worth playing if you love first person shooters or are a Call of Duty fan. On the other hand, if you don't really like playing shooter games without a controller, then you might find that you don't enjoy the game.

#### Avantages / Désavantages

The controls are quite easy to figure out. There are countless options and choices. It has both 1st person and 3rd person views while playing.

Map choices are limited. The connection can be unstable at times. There are a lot of ad pop-ups.
