

WhatsApp Messenger

WhatsApp Messenger

WhatsApp Messenger is a messaging and voice app that allows you to do things like send text messages, voice messages, do voice call, and make video calls. Users can also share photos, videos, and documents. You'll need to have a network or internet connection to use the application, but this makes it so users don't have a data cap.

One of the features that many people love about this application is being able to make their messages disappear. For whatever reason, many users want to have the option to have their messages deleted after reading. They can either choose to have the message deleted a few seconds after opening or have them deleted after a longer period of time. In addition, users can see who they chat with the most, mute a conversation, and make customizations to application settings.

Not only is the app available across multiple operating systems, but it's also available all over the country. Users can call anyone, including those that aren't signed up with the application. It's very easy to use and can even be used by those that don't have much experience with technology. You can save all of your favorite photos or videos and talk to your family or friends every day. ## Key Features

Some of the features of WhatsApp are listed next.

Formatting Options

There are many formatting options available for those that use WhatsApp messenger. In addition to being able to bold or italicize, you can also change the font and color for your words. Depending on your needs, you should find that this application has plenty of formatting options to get things the way you want them to be.

Statistics

This is a great tool for those that are wondering how much they use the app and who they talk to. Not only will you be able to see total messages, but you'll also be able to see how many were sent or received. It will also let you see when the last time you messaged was or when they sent you a message last.

Shortcuts

You can use shortcuts that are pre-selected to help make things a little easier. Some of these shortcuts are used all of the time, while others are only used occasionally. Some of the shortcuts

you might use have to do with things including emojis, copying, pasting, and creating new groups. These were created to allow you to navigate the app easier and quicker.

Map Location

With WhatsApp, users have the ability to show their map location with others. They don't have to share it with everyone in their contacts and they can choose the specific people they want to share it with. Similarly, other users can send you their map locations and let you know their exact locations.

Conclusion

WhatsApp is the perfect solution for those that are looking for a free communication app that's used over the internet. You don't have to pay anything and it can be used just like a traditional phone service. You can set or change your number and add contacts for easy communication. You can even voice chat or video call, which isn't offered by many other free messaging applications.
